I love the official models, but I also love to make custom-themed terrain pieces for whatever weird concept I have for an army. This can be hard with the weird shapes the company uses for these pieces, so here is a stencil project to help support fun creations in the community!

This listing is for the Wyldwoods. Nurture the forest and reap the rewards.

Tree Suggestions:
fantasy flair:

I'd recommend pairing these in a digital kitbash with some of GrimGreebles prints!

something realistic:

Try my Realitrees! They are 3D scans of trees, several available free, even more for a small fee.

Actually have the model and have something to point out/correct? Please share in the comments I'm always happy to update any models to make them the most accurate for the community.
