Summary

Topographic 3D models of (almost) all European countries.

[Art & Design](#) > [Other Art & Designs](#)

Tags: [landscape](#) [terrain](#) [topography](#) [map](#) [europe](#)

This project contains terrain maps of almost all European countries. Countries not included are either too small or not fully in Europe. Those are: Greenland, Malta, Andorra, Liechtenstein, Monaco, San Marino, Vatican, Russia and some minor islands.

Note that some countries are divided into multiple files, since their border is not connected by land. These are: (Country : File names)

- UK: Great Britain, Northern Ireland
- France: France, Corsica
- Italy: Italy, Sicily, Sardinia
- Denmark: Denmark, Zealand
- Netherlands: Netherlands, Frisian Islands
- Greece: Greece, Zakynthos, Kefalonia, Crete

The sea is 2.985 mm thick and the height of mountains is multiplied 10 times (i.e., **Vertical exaggeration** factor is 10).

The terrain was generated using touchterrain.geol.iastate.edu tool.
