Dummy 13 Dirt Bike!

This model is a remix of the **Dirt Bike Toy / Model** by [Addison Lane Creations](#). I scaled it down to 80% in length/height and 60% width to help fit the legs a bit better. I also created handles that were compatible with the Dummy 13 hands.

This is a very well designed model. Huge props to [Addison Lane Creations](#) for creating such a great model. I think it modified really well to fit the Dummy 13 and the prints are extremely easy!

Glue is required.

I recommend **gluing the wheel and frame** halves together and **leave the axel free spinning** between them. I used hot glue, but any plastic compatible glue will do!

Have fun and keep printing. :)
