Here are some variations of my haunted tree candle light, hope you enjoy them!

Just print them with normal supports (of course you can call them tree supports ;)). I used 0.2mm layer height, 2 walls, 15% infill and normal supports.

In the generic size a normal electrical candle light should fit, but feel free to scale them up! I would suggest using brown PLA for the tree stump and glow in the dark PLA for the inner cup.

Assembly:
