Summary

This is in my opinion The BEST impossible vortex model that I've ever printed! Enjoy my design!

This is in my opinion the best impossible passthrough vortex model that I have ever printed or designed! Its very functional with an easy design that implements a low cost of filament, and great functionality!

Also feel free to send me any, comments/questions/makes/requests! I always love hearing about those!

V1.1 Passthrough Set

Make sure to check out my patreon page! **If you join for free you can receive (free) exclusive models only on my patreon! Also have access to more updates, polls, requests, and many other things!** **My Master Printer Patreon**

Also on my patreon page I have released the Design Files & Commercial License! Make sure to check it out! Design Files & Commercial License

Check out some of my other passthroughs from the popular, The BEST Series!

Or check out the collection for **all** my passthroughs!

Also make sure to check out some of my other designs here!

Expect more iterations of this model to come soon! Also I might attach another version of this model to this post or I might make a completely different post! So be on the look out!

Advanced Setting: Also, if you want a better turnout for your print, and your using prusa slicer, got to 'print settings.' Then go to 'advanced settings' and navigate down until you reach 'XY Size Compensation.' There

turn it down to ‘-0.2’, this will help improve the print tolerances even further.

Print Settings:

Infill: 0% (Yes 0% there is absolutely no overhang😉)

Filament: PLA

Supports: NO

Brim: NO

Happy Printing!!!
