HELLO

I present to you the new articulated dragon 025 with a skeleton design ideal for decoration, this design is **PRINT IN PLACE**, just print and peel off

I want to share with you a little of the design process of this dragon, it was born from the idea of creating a skeleton with this in mind,
the hollow skull was designed with a connection to the spine and for the legs the visible joints are the grip, after sketching the idea it was modeled in 3D and later printed in Bambu x1 Carbon for which I do not need supports.

and here is the result I hope you like it.

ADVANTAGES

• This dragon design is adjusted and scaled for printing on the most printers on the market.
• Ideal for those starting out in the world of 3D printing.
• This design requires no supports and is fully articulated.
