Tags: [box](#) [drone](#) [case](#) [bag](#) [charging](#) [usb](#) [dji](#)  
[portable](#) [neo](#)

3rd version of my minimalistic box for DJI Neo. Supports USB charging on the go. Can be worn as crossover bag or can be put on your belt or just be thrown in your backpack. When closed it's very durable.

Can be printed from PETG or PLA Basic. Probably won't work very well with Silk or Matte since those material is expanding a bit, and you will have hard time to close this box.

You will need **single Screw M3 x 20 and M3 nut** to put parts together. During assembly check carefully holes as one side is designed to insert nut.
