Summary

It holds your phone on your bike's handlebar.

[Sports & Outdoor](#) > [Outdoor Sports](#)

Tags: [bike](#) [smartphoneholder](#)

Hardware required:

- 2x M3x16 bolts
- 2x M3x10 bolts
- 4x M3 nuts
- 4x Rubber pads (optional, but definitely recommended)

Wrap your handlebar with some electric tape. It will protect it and ensure better grip.

There are two more types of base for very narrow and very wide devices.

Note that I designed it to use on bike trainer and I don't know how it'll behave during actual ride, although it should work just fine.
