updated 28. 10. 2024 | published 28. 10. 2024

Summary

A little pumpkin screaming hell out of itself... (and fortunately doesn't pee in his pants)

UPDATE: Added a clean body version so you can scale the pumpkin up with no big fuzzy skin effect!

Get ready for the screaming pumpkin, who's just as scared of Halloween as you are!

This Halloween pumpkin will add the perfect touch to your spooky decorations for the creepiest day of the year.

Download the single-color version and use support structures to give the pumpkin stability under its tongue and palate. Or, download the multicolor version and print the pumpkin in five different colors, or use the individual parts that fit together perfectly, allowing you to print each color separately.

Remix culture allowed! I'm excited to see your prints.

Happy Printi... uh, I mean... Halloween!
