From the well received [GREATEST Towel Hook V2](#) now an Remixed Version that can be hang on a door without using tape or screw

- **I really liked the original model but i didn't want to attach it with tape or screw, so i remixed it to be hang on a door**

These towel hooks are an amazing addition to your kitchen or workshop. You can hang your towels using a single hand and easily take them off

Please, don't forget to post a make and tell us the Size you printed !

Features

- Available in multiple sizes
 - Compatible with 17mm, 19mm and 21mm thick doors
- f3d parametric model included
 - Change Parameters > door_thickness

Printing

- This hook is designed to be printed without supports
 - The provides files are already oriented in the correct position
 - Make sure you have good cooling for the overhang
 - You may use supports if you want better results

Change Log

- Added a 19-21mm wide hooks
- Added the f3d file
