Summary

Just a simple 20x20x20mm calibration cube transformed into a pass through helix model.

Tags: test calibration cube printinplace helix passthrough

I wanted to try designing an impossible pass through model and decided to use a simple 20mm calibration cube as a base.

The tolerances between the parts measure 0.4mm - so it's rather simple to accomplish a working 3d print.

Please consider leaving a like - this really helps me! Thank you
