A SciFi Space Port factory remix for a generic SciFi setting, at 6mm scale.

I've fixed many of the meshes and made it manifold for printing, added some extra detail (doors, vents, lights, etc.), and scaled it up to 125% from the original thing specifically for 6mm scale. This building comes in two variants, both based on the original design. I wanted to conserve some of the hidden detail, so I just made it into two buildings: I mirrored one for additional variation and readjusted the proportions of the other for the same reasons. Oh, and completely replaced all of the pipe systems! (that was a big PITA).

This set is intended to be compatible with the other 6mm SciFi terrain sets I have released - search my other things for more.

Please feel free to leave a tip if you like the model and think it is merited - an occasional coffee helps fuel the creativity and effort and sustains morale :)

Alternatively, if you want to contribute a little, but still get something for your money, please see my unique designs on Cults 3D. For a small cost (half a coffee), I have a few unique 6mm building creations:
