Tags: [box](#) [puzzle](#) [lock](#) [safe](#) [code](#) [cryptex](#) [number](#)

Version 2 available

Version 2 can be printed without supports, has tighter tolerances and is smaller while keeping the same inside dimensions. It can be found [here](#).

A larger Version with 6 digits is available [here](#).

A number safe with an adjustable code that you can use for a creative gift box.

You can set the code by pressing the number rings onto the lock rings. Make sure the number you want is aligned with the hole.

When all four rings are in place, you can use a little glue to attach the end cap. There is no load on the end plate, it just prevents anyone from seeing the lock mechanism.

Have fun!

Model files

number-safe-end-cap.stl

number-safe-lock-ring-4x.stl

☐ print 4 times

number-safe-outer-bolt.stl

number-safe-inner-bolt.stl

number-safe-number-ring-4x.stl

☐ print 4 times

number-safe-inner-bolt-no-gap.stl

☐ variant without the little gap to open the safe
