Description

Tightening the nuts on your Logitech G27, G29, G920, or G923 steering wheel doesn’t have to feel like an arm-wrestling match with a gorilla. This wrench, based on the original design by magno23 (thanks for the initial work!), has been beefed up for durability, stretched out for better leverage, and fine-tuned for a grip that won’t slip. Say goodbye to sore hands and hello to stress-free steering wheel setup!

Print instructions

To give the print a bit of strength be sure to use 3 perimeters. I've had good results using 20% Gyroid infill.
