Hi!

I didn't find any perfect fit low profil controller mount for my SKADIS pegboard so I did one myself.

I designed it around a controller 3D scans so that it can be perfectly ajusted while remaining as discreet as possible.

Controller supported (WIP):

- XBOX Series
- Sony Dualsense (PS5)
- Sony Dualshock 4 (PS4)
- Nintendo Switch Pro
- 8Bitdo Ultimate (I can't test it, please give feedbacks)
- 8Bitdo SN30Pro (I can't test it please give feedbacks)
- Steam Controller (2026)

Both Right and Left mounts can be printed in half an hour without any support.

I hope you will like it!

If you need other controllers feel free to ask and I will try to add matching mount even if I don't have those controllers. In this case I may ask you to test the model to control the fit and to know if it needs some adjustments.

UPDATES:

13/05/2026:

- Addition of Steam Controller

02/02/2025:

- Addition of 8Bitdo Ultimate
- Addition of 8Bitdo SN30Pro

08/01/2025:

- Update of the XBOX Series mounts so it fits even better
- Addition of Dualshock 4
- Addition of Dualsense
- Addition of Switch Pro
