This is a remix / minor mod of the excellent DJI Mini case design by rosscadguy, originally posted on Thingiverse: https://www.thingiverse.com/thing:4085056

I wanted to be able to print it without support or overhangs to keep a smooth finish on all surfaces, so I made it just a little bit chunkier. The body can print upright, and the lid in one piece upside down, without any need for support.

Adds a slight bit of volume to the outside, but the interior is unmodified and still fits like a glove as in the original design.
