Summary

It's a Shrimp, and yes, it's articulated! ;)

Updated Model: there should be no more bed adhesion issues.

Carefully crafted with intricate details and smooth articulation, this 3D model is designed to print in place without the need for support structures. Ideal as a unique decoration, a satisfying fidget toy, or simply a showpiece of 3D printing precision.

Note: due to its fine details, it's not recommended as a toy for young children.

Happy printing!

I recommend using PLA and max a 0,6 mm Nozzle. Make sure your Filament is well dried to avoid stringing in the leg area.
