In case you print several of these [filament swatches](#), you might need a storage solution.

Here is a configurable one. You can even add little pegboard nubs to fix your swatches to a p-slot type pegboard. This box is based on the [configurable box](#) from [Jaxel](#). Thanks a lot!

To customize, install [OpenSCAD](#) on your own computer and follow the customizing instructions on [this thing page](#).

Alternative box

I posted a new box with flippable swatch holders [here](#):

Print-in-place flipping Filament Swatch Box

Credits

Thanks to [mino](#) and [divinejimmi](#) for their photos and the approval to re-use them here!

If you print a box, please share a picture using the "comment" button and attach the picture.

Bugfix in V4: Thanks to [Adam](#) the lid and box are now level and ready for printing.

Update in V5: Thanks to [DomDomDom](#) for the idea to use it for dia frames and make a side-by-side-version.

You can customize:

- 3 lines of text (Default: Filament swatches)
- The number of swatches to hold
- Number of columns of swatches side-by-side! Massive swatch collections possible. STL for 2x40 and 3x40 swatches included!
- Wether pegboard nubs are to be included (for P-SLOT peg board type)

If you like it, please have a look at all my [customizable creations](#). There are configurable-text-based creations, [multi-line label](#), [gadget display stand](#), [sweeping name plate](#), [bunting banner](#), [customizable text box III](#), [pyramid text](#), [name plate](#), [Customizable text box with lid](#) and [round text](#). Have also a look at my configurable [pack of dogs](#), [rabbits](#), [reindeers](#) and [santas](#). There are also useful [coat hangers](#) and [finger toys](#).

Print instructions

It slices well using PrusaSlicer, Slic3r or Simplify3D. Don't use supports.
