updated 11. 1. 2022 | published 8. 1. 2022

Summary

I needed a mount to display my articulating dragon so i made this 'rock' with gems growing on it and 2 embedded eggs

9.38 hrs

2 pcs

0.30 mm

0.40 mm

PLA

235 g

Prusa
MK3/S/S+

Tags: [decoration](#) [dragon](#) [mount](#) [rock](#) [art](#) [articulating](#)
[sculptures](#) [gem](#)

Printed at 0.3 mm layer height in about 4 hrs. designs to print with **no infill and no supports.**

There are 2 holes under if you want to put an led light source to illuminate your gem crystals likewise you can paint the rock formation and even the dragon eggs to add some life to it. Enjoy

Update: I have added a revised scaled up STL and Gcode version at 120% if you have a larger dragon
