Hi there!

There are 2 versions of this print, one without and one with holes. I use the pot for different kinds of indoor house plants.

Most of my happy pots i printed with 5% gyroid infill it's very sturdy! In my opinion you could use 10% or even 15% infill if you wanted a heavier print. Also, the print takes about ~15 hours on my Prusa i3 MK3s+.

This print does not need any supports!

Happy printing! :)
