designed in fussion

there are holes to hang them on keychain, pendant or everywhere else.

I include 3 profiles.

3 colors, 2 colors, single color.

The multicolor prints are printed in one plate with by object print sequence.

The single color profile has 2 plates so to choose the color you want for the cats .

single color version has the characteristic of their faces as relief instead of colors.

i have uploaded the single color stl files for the 2 cats also so if you don't have bambu you can download these files directly.

*** Please note that the tolerances are 0.15mm . For my machines and dealing with fillaments this is big enough just to fit the cats together. If you have a machine that is way off calibrated don't print this and leave negative stars.***
