Now that my daughter had enough tables for her Playmobil bar (see <https://www.prusaprinters.org/prints/106944-playmobil-table>), chairs were of course still missing. So Dad had to do it again ;-)

It is a two-part print that can be put together without glue (snap fit). Since the fit is pretty tight, you may have to do some sanding to get the seat pad to slide in. The chair needs support structures, I have printed in PLA so far.
