## Updated!! 28mm Modular Medieval RPG House – FDM-Friendly

Build the perfect tabletop RPG setting with this modular 28mm medieval house, designed for easy printing, gameplay, and future expansions. Whether you're running D&D, Pathfinder, wargaming, or building a diorama, this house adds classic medieval charm with minimal print hassle.

### Updated Model Features:

- 5-Part Modular Design – Roof, main floor, floor, and interchangeable base (short with steps or tall with stairs).
- Fully Modular & Expandable – Future add-ons will include more roof types, additional floors, and different architectural styles.
- Easy Access & Gameplay – The removable main floor and roof enhance playability for RPG sessions.
- No Supports Needed – Optimized for FDM printing with reduced filament usage. Windows may benefit from supports but print fine without them.
- Secure Yet Removable Fit – Each piece locks in place but can be easily removed for gameplay flexibility.

### Printing Recommendations:

- Printer Used: Ender 3 S1
- Print Time: ~24 hours
- Filament Used: ~184g (less than the previous version!)
- Layer Height: 0.16mm
- Infill: 15%

- Supports: Not required (optional for windows)
- Scaling: Designed for 28mm miniatures. Scale to 115% (1.15x) for 32mm minis.

This expandable medieval house is perfect for fantasy villages and RPG towns. More modular terrain coming soon!

Share Your Prints!

I'd love to see your painted versions or custom setups! More medieval terrain is on the way—stay tuned!
