Note! June 13 2022 Version 5 Released. ****

- Increased spacing and set back to accommodate the Larger 3 amp and up battery sizes
- Added single and 2 unit shelves if you don't have 3
- added profile and snugged fit for better hold and stiffer over all shelf strength

Simple shelf to print and hold up to 1, 2 or 3 spare Milwaukee M12 batteries conveniently on a wall or other mount.

Keeping Version 4 as it's a tad smaller and takes less space so if you only have the 2 amp batteries it's still fine!
