As always!

The key to printing my figurines is having **good adhesion** to the build plate. I use **CryoGrip Pro Frostbite** for printing, which provides excellent

grip, ensuring that every figurine prints successfully every time. I mainly use filaments from **Bambu** and have no issues with them either. If you have a different setup, make sure to focus on build plate adhesion, use high-quality dry filament, and everything should be fine.

All my photos are **real** and show an actual 3D-printed figure photographed by me.
