Summary

for keeping your headphones nearby.

[Hobby & Makers](#) > [Organizers](#)

Tags: [headphone](#) [headphones](#) [headphonehanger](#)

needed a quick solution to get headphones off of monitors.
BOOM! move it slightly to the right. (or left if you mirror it :)
My headphones have a 30mm headband, so that's what this one is made for.

[find enclosed the f3d file for customizing to your specs]

EDIT

I've added a new version (V24) I think it looks a lot better.
has more curves.

EDIT

I've added another veresion (V25) incase the backside of your monitor is curved. this should hopefully have enough on the side and top to still be able to double-sided tape it to your monitor.

Enjoy!
