Tulip Decor Figurine

Feel free to scale it as desired. For sure you can make it **bigger**. If you choose a smaller size, the model will be more prone to damage. Don't be tempted by a shorter printing time—**take your time** to print it properly, and you won't have to print it twice! :)

If reducing **print time** is absolutely essential for you, you can simply increase the layer height. Just keep in mind that this will also reduce the level of detail.

Be careful when removing supports. Stem might be fragile. Take your time!

Printed with **Fuzzy Skin** effect.

Fuzzy Skin: All Walls

Fuzzy Skin Point Distance: 0.35

Fuzzy Skin thickness: 0.2

As always!

The key to printing my figurines is having **good adhesion** to the build plate. I use **CryoGrip Pro Frostbite** for printing, which provides excellent grip, ensuring that every figurine prints successfully every time. I mainly use filaments from **Bambu** and have no issues with them either. If you have a different setup, make sure to focus on build plate adhesion, use high-quality dry filament, and everything should be fine.

All my photos are real and show an actual 3D-printed figure photographed by me.
