Tags: [cat](#) [springs](#) [fidget](#) [fidgettoy](#) [clicker](#) [paw](#) [catpaw](#)

This cat paw-shaped stress-relief clicker features a **3D-printable spring**, allowing use without a keyboard switch. However, **we strongly recommend adding a keyboard switch** for optimal clicking performance and tactile feedback.

Key Features:

- **Dual Compatibility:** Works with or without a keyboard switch (best results with a switch).
- **Pre-Configured Printing:** Parameters are already optimized for seamless, one-click printing.
- **Upcoming Update:** A keychain hole will be added in the next version (expected release tomorrow).

Design Notes:

- The spring is included in the 3D model for easy assembly.

- For users without keyboard switches, the built-in spring ensures basic functionality.
