Summary

Not fancy, not ingenious, just practical and effective storage of your cables

Hobby & Makers > Organizers

Tags: cable cables organizer simple usb effective

Lot's of nice, clever, ingenious, good looking cable organizers out there - this is not one of those. This one is simple, effective and practical.

Wind the cable on your fingers (3 of 4, depending on the size of your hand) and tuck it into the holder. That's it! No ends sticking out, nothing gets entangled when you put it in a drawer.

Need a cable? Pick a small box for a short cable, a big box for a big cable. That's it! And use different colors for different cable types (eg USB-C, lightning etc).

The can be slided into eachother for convenience.

Printing:
* Any filament of your choice
* No supports
* Bed-adhesion-flaps included, easily removable

Update July 6th 2022: Added 3 models that have a bottom (and therefor don't need bed-adhesion-flaps).

Printed quite a few of them myself and they work, that's why I'm sharing. Enjoy!
