This is a human scale, collapsible light saber inspired by lego! Live your childhood dreams and become a real life lego mini figure with this life size print!

I have always loved star wars lego sets. They combined two of my favorite things! Now I combined those with another one of my favorite hobbies, 3D printing!

I hope you enjoy this print file as much as I do!

Print settings

The light saber body should be printed with supports.

The light saber cap doesn't need supports.

The blade is designed to be printed in vase mode for .4mm nozzles

What side of the force will you choose?
