This drain snake was created to have extra long barbs to help grab all that stubborn hair that can get caught in the drain.

PLEASE NOTE: you need to have a drain opening that is greater than 4x12mm in order for this snake to fit in your drain. I also HIGHLY recomment you print this out of PETG. It is more flexible and less likely to

break. That being said, you still need to be gentle, this is plastic and it can break. Use at your own risk.

You can print wiht 100% infil if you need it to be a little stronger.

Please reach out if you have any questions and have a great day!
