:IMPORTANT THREAD / BOLT INFO:

I had to scale the clamp bolts up in size about 1-2% and the bolts for the base about 3-5%.

That's what worked for me and FOR MY LIKING - everybody's setup is different, your mileage will vary, everything may print immaculate the first time as the files are or they won't.

You'll need each of the following for one complete unit:
2x Left Clamp
2x Right Clamp
2x Spring - Tensioner
1x Base

2x Clamp Bolts

2x Bolts that hold Clamps to the Base

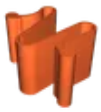

This remix is based on
