Tags: [wallmount](#) [batterypack](#) [makita](#)

Just a simple interlocking batter holder for the popular Makita battery operated models. If you have a few of them like me, they don't stack well and tend to be everywhere except when you really need one.

I was able to print six at a time on a Prusa i3 MK3, 18 hours print time at 0.2 mm resolution. Print in PETG for good strength, ABS not needed.
