This is the 3ds game cartridge holder.

- The holder is designed to close like a book, protecting the sticker on front of the games, while helping storing them, or for display.
- Supports both 3DS and DS games.
- Holds up to 12 games at once.
- The hinge uses a 1,75mm fillement (Max 2cm long, if it won't stay in place, then a little glue can be used)
- It is designed to mimic the look of the 3DS.

"please note that this is still a work in progress project, I have yet not been able to test this design, so if it doesn't hold the games in right, or the slots are too tight/small, please let me know, so this can be fixed"
