Yin Yang symbol made spherical. I printed it as one piece on my Prusa i3 MK3S+ and MMU2S. There is also a variant that is just a unique take on the Yin Yang.

You might be able to print it in pieces if you don't have an MMU; the .3mf file has all the parts, you would just need to print them separately. If you do print this way, be aware that there is no tolerance between the parts though because it is designed for MMU. You may have to scale down the circles slightly to make them fit.

You will need supports regardless of whether you use an MMU or not. Enjoy! Please rate, share your makes, and check out my other designs!
