## A Sleek and Decorative Notebook Stand!

This notebook-stand saves space on your desk and enables optimal cooling.

For laptops/notebooks of around 19-20mm thickness (like HP's Elitebooks)

**Printing Recommendations:** PLA or PETG, 0.2 mm layer height, supports needed, 15 % infill, 3 perimeters.

### Remix Changelog:

This is a remix of Arciello's original design, which comes with a clamp to

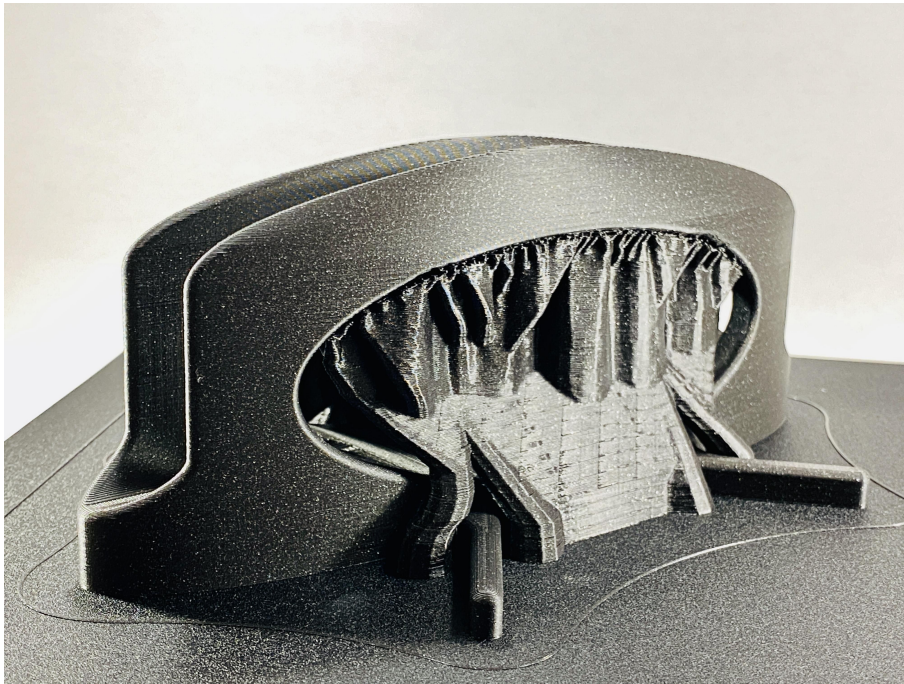

attach to your desk.

Since it is impossible for me to attach it like this, I re-designed the model to stand stable on its own. Therefore I removed the clamp part and added 4 feet to it.

**Tipp:** Use tree supports for minium surface-irregularities on the bottom part.

(see example picture below)

Tree-Support touching buildplate only:
