I have been looking for the my perfect Bed scraper.

So, I modified my favorite one in two aspects:
A created as 0.6mm 'striking edge' (on a 60o angle) that extended for 3mm (or 15mm)
and much ridged blade transition to the extended handle

The goal is to print a scraper that has a printed and durable edge
Thanks for providing the STEP file what made things very easy to remix.
