Summary

Super fast first layer test files.

[3D Printers](#) > [Test Models](#)

Tags: [calibration](#) [first](#) [firstlayercalibration](#) [calibrationtest](#) [firstlayer](#)

Print version A for a really fast print to make initial adjustments. Once version A is printing correctly, move on to version B to fine tune your settings.

I printed these with Prusa Galaxy Black PETG at a 0.15mm layer height.
