!!MK3 Version is optimized for small prints, only us MK2 at 100% scale or higher.

!!Added updated version with better clearance for hooks and wire.

An ornament loop that can be oriented to hang in any of 8 directions so you can position your ornament however you want! Attach to any 3D model to create a great ornament!

Used in all my models for my 25 Days of Ornaments challenge linked here: https://www.thingiverse.com/boulder_city_barron/collections/25-ornaments-of-christmas-21
