Summary

This adapter allows the connection of a 50mm vacuum hose to any 50mm PVC fitting. Choose from long or short!

This simple adapter allows the direct connection between a 50mm vacuum hose and any two inch (50mm) pvc fitting.

The STL is in two sizes - the short one is pictured, I printed the longer one because I had a particular use for it so thought I would provide it as an option.

The shorter one is fine and uses less filament!

I've printed them in PLA .20 mm layer height.
