Summary

Tie fighter made to hold Echo Dot 3rd Gen may work with earlier version as long as you have one to test.

Tie fighter made to hold Alexa Dot 2 may work with Dot 1 as well but don't have one to test. Working on finishing the version for the newest dot as well. Designed the wings to lock into place and use 2 screws each side M2x8mm. The wings are printed in 4 pieces for each side 2 outside and 2 inside so they can be laid flat on the printing bed. All pieces are then glued together and then attached to the cockpit.

Category: 3D Printing
