I created this wand as a toy for my daughter some years ago. She made great fun out of it!

All the parts can be printed separately in different colours and materials to match your kids preferences.

The print quality is good enough at 0.2 mm layers, but it can also be printed with thinner layers for a smoother surface.

The assembly is easy using SuperGlue or any other suitable glue. I added some rice to the star before the assembly so the wand sounds as a rattle.

I hope you like it!

Update 24.02.2022: I just uploaded a new star without any name.
