Tired of all the clamps, zip ties etc? If you have an enclosure made of steel you can use this magnetic cable holders. Fits cables from ~3.5 mm up to a diameter of ~4.5 mm.

All you need is a 8x4 mm or 8x3 mm magnet.

Print as many as you need, but print it on the side (take a look at the gcode).

If you ever need to remove the magnet push a small allen key through the hole on the top.
