Lounging Cat altered with <http://www.voronator.com/> and tinkercad. I needed to use the smaller file offered from voronator in order to transfer it to tinkercad and cut the hole in the bottom. A battery powered tea light will fit nicely through the bottom hole.

Print instructions Category: Decor How I Designed This

Voronoization + Tinkercad.

I used cura to scale the original stl to just fit on the bed at an angle and then saved/exported it to my desktop as a STL.

I then used <http://www.voronator.com/> settings: -> output settings export as stl. Number of Holes: standard. Thickness of new layer: Standard.

Hole cut out using tinkercad.

Model files
