Tags: [test](#) [model](#) [usb](#)

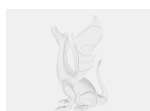

Modelled in Rhino after the USB Stick that came with my Prusa Mini+

Measured with calipers as accurate as I could. Essential dimensions should be ok at least.

I made it because I wanted to test the position of the USB stick and USB port as I remixed a back plate for the display. Never printed it, and I'm not sure why you would want to.

Uploaded it if anyone should want to use it for similar purpose.
