Stand / Charger for my sons and their iPhone 6S.

I use Elough charging cable and magnetic pin from here: <https://www.aliexpress.com/item/32948923029.html>

You don't need anything but slide it in and bend/secure the cable at the channel on bottom side of the stand.

I used generic PETG

layer height: 0.2 or 0.15 recommended

no supports

no brims

just a tiny overhang

Enjoy ;)
