Indoor Tap Adapter - V2

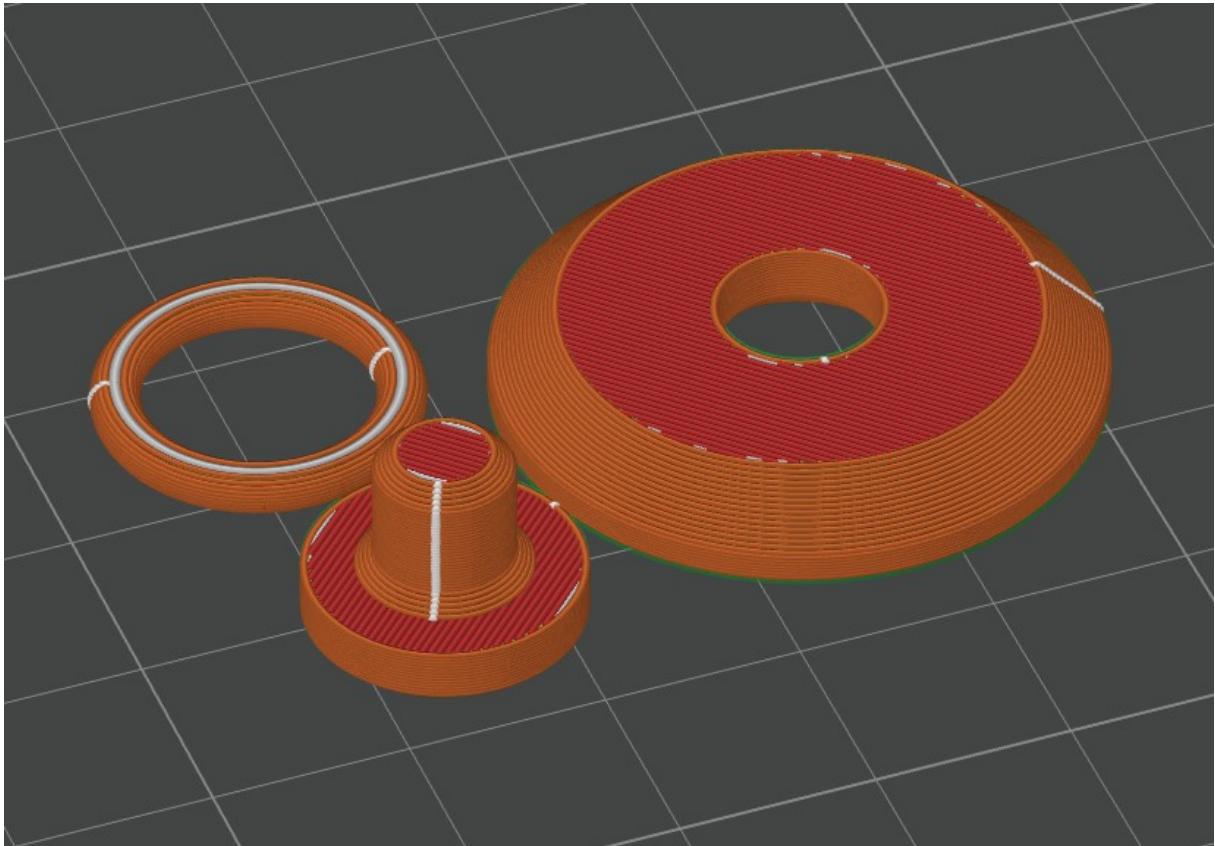

This 3D-printable adapter is designed to connect garden hoses to standard indoor taps. Easy to install and use, it requires no support structures during printing and ensures a secure, leak-free connection. Compatible with most common tap types. Perfect for watering or washing tasks using a garden hose directly from your indoor faucet.

Instructions. Insert the anti-scratch component as shown in the figure. Then insert the gasket. Finally screw the upper part to the adapter.

Use 100% infill for components to be printed in TPU.

Use 100% infill for components to be printed in TPU.
