### Summary

Measures 18 ml of powder or liquid

[Household](#) > [Kitchen](#)

I designed this measuring spoon to measure out pretty much exactly 18 ml of powder dishwasher detergent, because that's the recommended amount per load by the manufacturer. (My dishwasher detergent brand: [dm Denkit Spülmaschinen-Reiniger Pulver Classic](#))

Also includes a “half” line for 9 ml. This is to be able to reasonably accurately dose the recommended amount of 27ml (18ml + 9ml) for heavily soiled dishes.

Files for both dual-color as well as single-color prints are provided.
