Calvin and Hobbes, from the comic strip by Bill Watterson.

This is a onepiece version of Calvin and Hobbes based on my multi-part Calvin and Hobbes model that I've previously posted (currently only on myMiniFactory and Cults3D).

I teamed up with maker/designer stevenisuseless (Steven Parrish) for this project. See his work at:

<https://www.thingiverse.com/stevenisuseless/designs>

I converted my multi-part model to a onepiece model for SLA and FDM printing. Steven sized the model large and printed it on his Phenom L SLA printer. He then painted the SLA model with inexpensive craft paints found at Walmart, as pictured.

Notes:

****For FDM amd SLA printing:****

Size the STL file as needed for your purpose and add Slicer supports.

Enjoy!
