updated 8. 2. 2022 | published 8. 2. 2022

### Summary

These files have the indicator facing the sides of the planter rather than towards the plant.

[Household](#) > [Outdoor & Garden](#)

These files give you the option to print the indicator with the level facing the sides of the planter. This is something I had wanted as my planter is set up on a window sill and I wanted to check the water level at a glance. I loved the idea but wanted the indicator facing a different direction.

See kripso's original design for a description and alternate orientation.
